

# \$1.6 Million Infrastructure Replacement Project Underway In Newberry Township

## UPDATE

Additional excavation by our contractor to connect the new water main with service line connections is pending in the Valley Green Area of Etters, PA. This will delay final restoration of paved surfaces and lawns until the work is completed. Due to the scope of this extensive infrastructure replacement project that will enhance service reliability, final restoration may not occur until spring of 2018. We apologize for this inconvenience and thank customers for their understanding.

## ORIGINAL MESSAGE

Infrastructure replacement is ongoing at SUEZ as we endeavor to upgrade our water distribution systems to enhance reliability. The company has invested nearly \$1.6 million to replace over 10,400 feet of existing water main varying in diameter from 1.5 inch to 6-inch with nearly 11,900 feet of new ductile iron water main varying in diameter from 4 to 12-inch. The project also involves installation of 68 new residential service connections and a new fire hydrant.
